

ENSATM

Energy Saving Devices

Achieve more using less.

ENSATM practical energy efficiency solutions for a brighter future.

A nighttime photograph of a cityscape. In the foreground, a multi-level highway with several lanes is visible, with some cars and streetlights. In the background, a large bridge with tall, illuminated pylons and a cable-stayed structure spans across the scene. Further back, a dense urban skyline is visible with various skyscrapers, some of which are brightly lit. The sky is dark blue.

ENSATM

Energy Saving Devices

We believe energy efficiency is key to creating a richer society with safer, happier communities & productive workplaces.

At ENSA, we understand the complexities of lighting upgrades. Production interruptions, equipment hire, increased operational expenses and labour costs make it essential for upgrades to be reliable and perform as intended from day one.

The ENSA LED lighting and energy saving devices range comprises practical energy efficiency solutions, designed for fast installation, power consumption reduction and improved lighting performance.

Our range includes industrial grade fixtures such as high bays, street lighting, flood lighting and canopy lighting. It also features a wide range of lights, such as LED tubes, downlights and panel lights, that are ready for commercial, shop fit-out and residential applications.

Products also include backup battery LED lights for emergency lighting, emergency exit signs and intelligent lighting and sensors to compound your energy saving.

LED lighting is the lighting technology for the future and ENSA is at the forefront of the field. Our products incorporate the latest in LED lighting technology to ensure each light offers excellent efficiency, light quality and service life.

ENSA™ Product Solutions Guide

6

High Bay Lighting

Professional high bay lighting ideal for industry, warehousing and more.

10

Flood Lighting

High power residential, commercial and industrial grade LED flood lighting.

22

Street Lighting

Modular and solar LED street lighting for roads, walkways, public and remote areas.

28

Canopy Lighting

Low bay LED lighting for petrol stations, car parks, industrial lighting & more.

30

Panel Lighting

Minimalist fluorescent troffer replacements for use in the office or workplace.

32

Intelligent Lighting

Smart sensor-equipped oyster & batten lights with battery backup for emergency.

38

Tube & Link Lighting

Energy efficient LED tubes with option for microwave sensor models.

44

Downlighting

Comprehensive downlight selection in premium and standard series.

62

Retrofit Lighting

Wide range of energy efficient easy replacement LED bulbs and globes.

70

Energy Saving Switches

Motion sensor switches with microwave & PIR motion detection & dusk/dawn switches.

72

Transmitters/Receivers

Mains voltage transmitter/receiver devices and light activation via external sensors.

Commercial LED High Bay Lighting

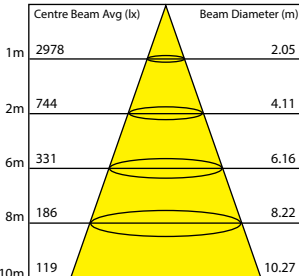

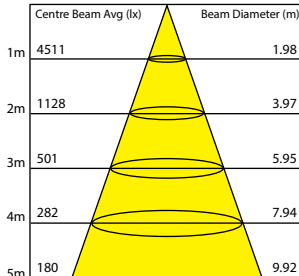

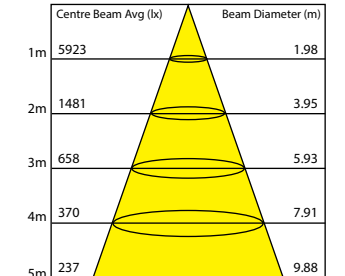

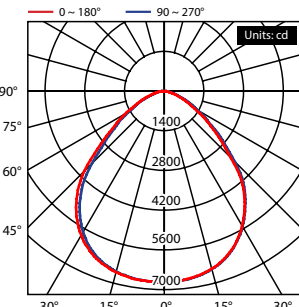

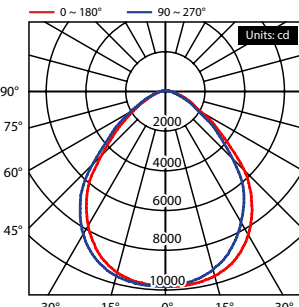

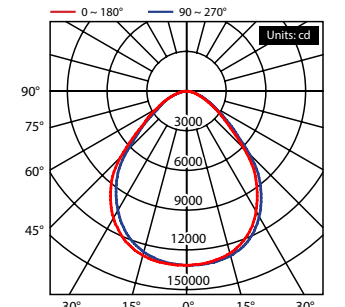

LHB-D Series: Commercial chain mount high bay lighting in 100W, 150W and 200W models

The ENSA™ LHB-D high bay series delivers energy efficient lighting to industrial and commercial environments at an economic price point. They are also weather-resistant, making them ideal for outdoors installations and events.

The LHB-D series delivers ideal lighting conditions in areas with high ceilings up to 12m, such as warehouses, manufacturing facilities and exhibition halls, with a high luminous efficacy for optimal power consumption. Each light has a compact, robust aluminium body and comes in 5700K cool white colour temperature.

- 100W, 150W and 200W industry-ready LED high bay light
- High 130lm/W luminous efficacy for energy efficiency
- Includes G1/2" thread hook for chain mount & safety cable
- 180° U-bracket and G1/2" pole mount (optional)
- Compact and robust: no additional reflector required
- Efficient heatsink cooling technology, IP66 weather rated
- Available in 5700K cool white colour temperature
- Available in 60°, 90° and 120° beam angles

Food Grade LED High Bay Lighting

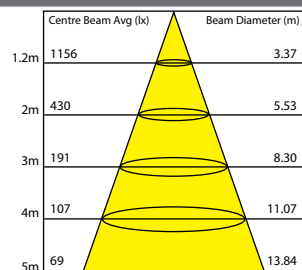

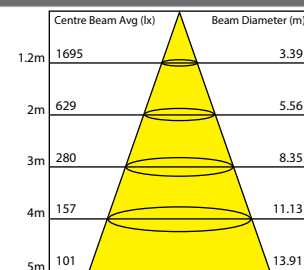

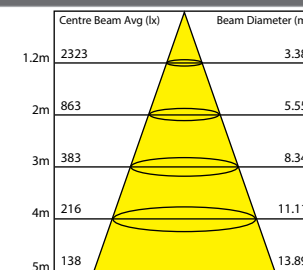

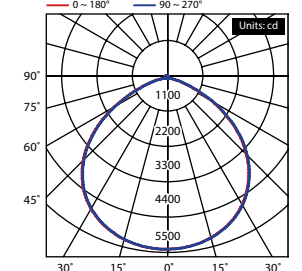

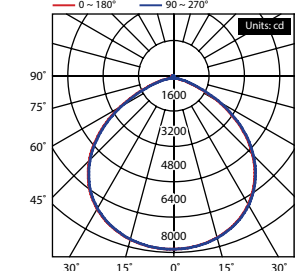

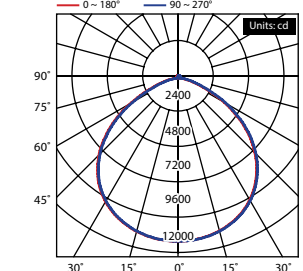

LHB-F Series: Professional food grade high bays in 100W, 150W and 200W models

The ENSA™ LHB-F series of professional high bay lights deliver energy efficient lighting to industrial and commercial environments. These lights are purpose built for food preparation environments & are easily cleaned with an IP69K rated body.

The LHB-F series delivers superb lighting performance with high luminous efficacy of 135lm/W. Models feature a powder coated, corrosion resistant heatsink with a smooth surface that reduces build up of dust and simplifies routine cleaning. Luminaires are free of glass to ensure safe practices when installed in food preparation environments.

- Food preparation LED high bays in 100W, 150W & 200W
- In 4000K natural & 5700K cool white with 120° beam angle
- Suitable for food processing environments - no glass, smooth non-toxic surface & easy to clean
- Highly durable IP69K weather resistance - steam cleanable
- High 135lm/W luminous efficacy for energy efficiency
- Series is IPART approved for use in the NSW ESS
- Prismatic reflector available (*sold separately*)

Additional Accessories

The optional prismatic reflector (LHB-FRFP2) creates a more even distribution of light, sending light out in all directions.

Recommended for installations at lower ceiling heights.

High Power LED Flood Lighting

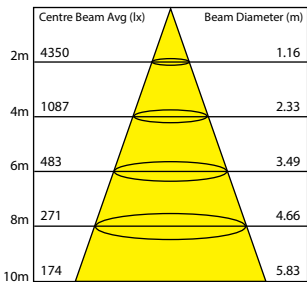

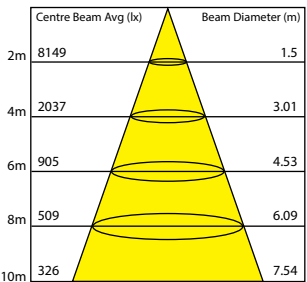

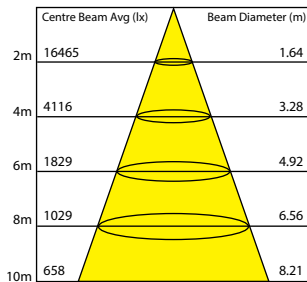

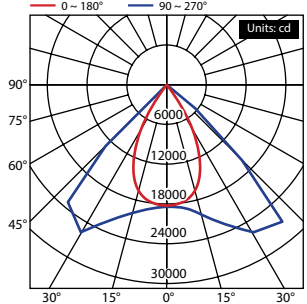

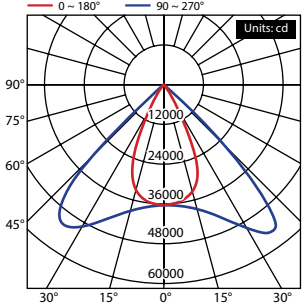

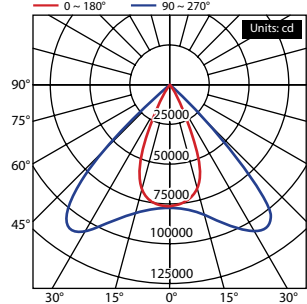

LFL-D Series: Large format flood lighting in 240W, 360W, 480W, 720W and 960W models

The ENSA™ LFL-D series of high-power LED flood lights delivers exceptional lighting performance in a robust, weather resistant package. Available in 240W, 360W, 480W, 720W, 960W models with a wide 100° beam angle.

The LFL-D series flood lights are ideal for high power lighting in commercial and industrial environments including stadiums, car parks, building sites, security lighting, signage illumination and more. Each light has a robust powder coated, IP65 rated, aluminium body and tempered glass front for superior light transmittance.

- High luminous efficacy LED flood lighting (130lm/W)
- Available in 5000K cool white colour temperature
- IP65 weather resistant, suitable for outdoor applications
- Wide 100° beam angle, ideal for general purpose lighting
- Efficient replacement for halogen and metal-halide floods
- 360° adjustable two-point fastened mounting bracket

Professional High Power LED Flood Lighting

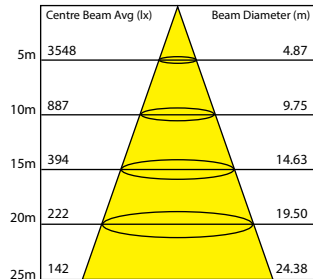

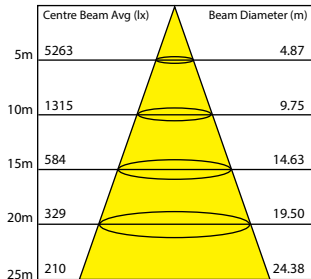

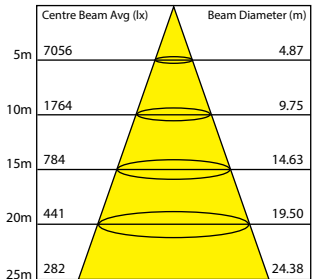

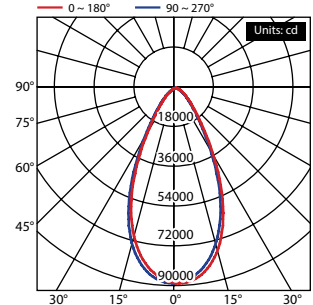

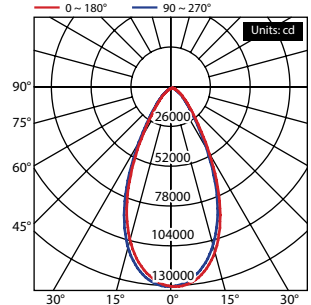

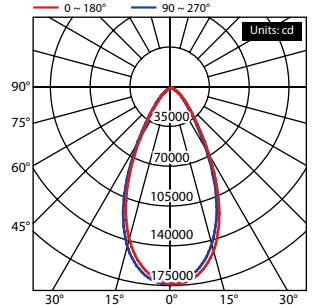

LFL-F Series: Adjustable flood lighting in 480W, 720W, 960W, 1200W & 1440W models

Combining innovative lighting design and leading energy efficiency, ENSA™ LFL-F Series LED flood lights deliver large scale lighting solutions without compromise. Lights feature precision adjustment controls with modular LED units that rotate and tilt to enable precision light aiming and smooth installation.

LFL-F Series lighting solutions also sport 165lm/W, low lumen-depreciation LEDs to increase lifespan and reduce required maintenance. They have been installed in sports lighting applications and in large outdoor production and carpark facilities.

- Best in performance LED lighting efficiency at 165lm/W
- Unique rotate & tilt modules for precision adjustment
- 360° LED module rotation and 140° tilt adjustment
- Reinforced mounting bracket with multiple mount points
- High performance, long lifespan Lumileds LED package
- High quality Meanwell driver, DALI dimmable optional
- Available in a variety of beam angles as per application
- IP66 weather rated, powder-coated aluminium chassis

Professional High Power LED Flood Lighting

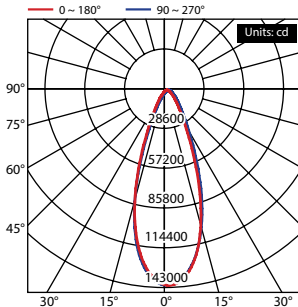

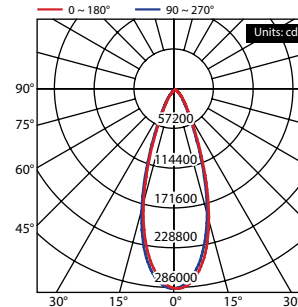

LFL-G Series: Modular flood lighting with U-shape bracket in 240W & 480W

Highly modular, the ENSA™ LFL-G Series of LED flood lights is a flexible choice large scale lighting solutions. Each light module can be individually adjustment adjusted with precision, easily rotating and tilting for a smooth installation process.

LFL-G Series flood lights are incredibly reliable with a rated lifespan up to 100,000 hours, and have versatile dimming options with both DALI and DMX control standards. These lights are ideal in sports lighting applications and in large outdoor production and carpark facilities.

- High performance 160lm/W LED lighting efficiency
- Unique rotate & tilt modules for precision adjustment
- 90° LED module tilt and 180° adjustable U-bracket
- Independently adjustable and detachable light modules
- High performance, long lifespan 5050 SMD LED package
- Optional dimming controlled via DALI & DMX standards
- Independent power box with efficient heat dissipation
- IP67 weather rated and IK10 vandal resistance

Professional LED Flood Lighting

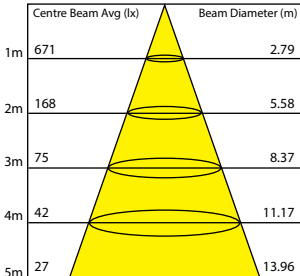

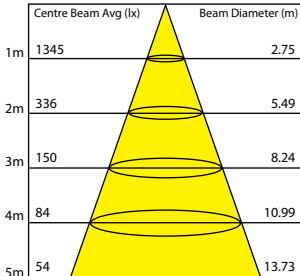

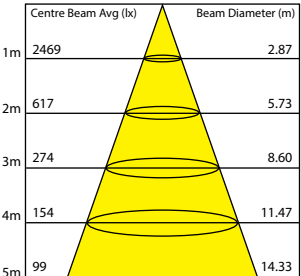

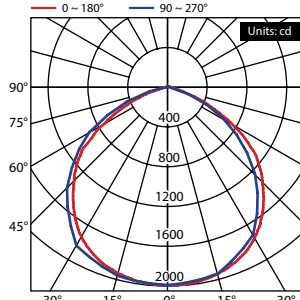

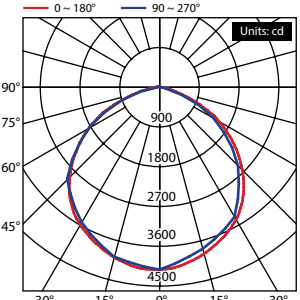

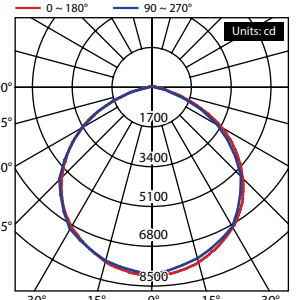

LFL-B Series: High performance floods in 20W, 30W, 50W, 70W, 100W, 150W and 200W models

The ENSA™ LFL-B series of high-power LED flood lights delivers exceptional lighting performance in a robust, weather resistant package. Available in 20W, 30W, 50W, 70W, 100W, 150W and 200W models with a wide 100° beam angle.

Ideal for general purpose lighting in commercial and industrial environments including parking lots, building sites, security lighting, sporting fields, signage and more. LFL-B series floods feature a slim, lightweight design with a U-shape adjustable bracket, making them easy to mount. Each light sports a powder coated, IP65 rated, aluminium body and heatsink for excellent thermal conductivity; a tempered glass front for superior light transmittance; and UV resistant ASA plastic bolt caps.

- High luminous efficacy LED flood lighting (110lm/W)
- Available in 3000K warm white and 5000K cool white
- Wide 100° beam angle, ideal for general purpose lighting
- IP65 weather resistant, suitable for outdoor applications
- 180° adjustable two-point fastened mounting bracket
- Series is IPART approved for use in the NSW ESS

LED Sensor Flood Lighting

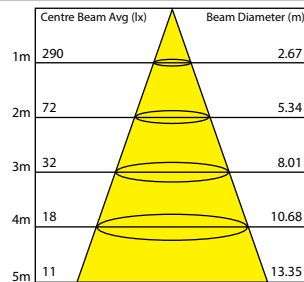

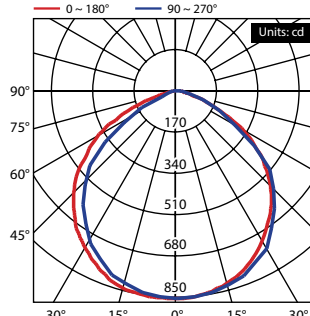

LFL-C2 Series: 20W passive infrared motion sensor LED flood light with U-shape bracket

The LFL-C Series combines efficient LED flood lighting with customisable motion-sensing technology to compound your energy savings. Available in 20W with adjustable ambient light sensitivity, on-time delay and passive infrared (PIR) motion detection to deliver energy efficient lighting and ideal for security and general purpose lighting.

The LFL-C Series is built with a metal, IP65 rated weather resistant chassis, making them suitable for outdoor lighting in residential, commercial and industrial applications.

- Available in 6000K cool white with 120lm/W light output
- Effective light distribution with 120° beam angle
- Adjustable PIR detection up to 12m with a 140° arc.
- Adjustable on-time delay (5s ~ 5min)
- Adjustable U-shape mount with over 180° of motion
- Adjustable PIR bracket (180° panning with 90°~90° tilt)

LFL-C20-CS2: 20W LED Sensor Flood Light in Cool White								

Residential LED Flood Lighting

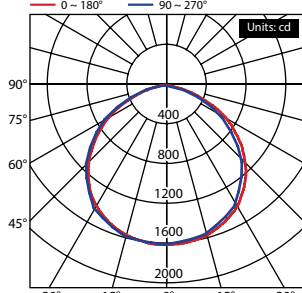

LFL-E Series: Affordable flood lighting available in 50W, in cool white colour temperature

The ENSA™ LFL-E Series LED flood lighting delivers reliable, energy efficient and cost effective flood lighting, ideal for use in residential and light commercial environments.

Available in 50W in cool white colour temperature, LFL-E Series models are best suited for general purpose lighting, in security lighting applications, for signage illumination and more. Lights feature a white plastic-coated aluminium IP65 weather rated housing, with tempered glass front and simple 180° U-bracket for easy mounting.

- High luminous efficacy LED flood lighting (90lm/W)
- Available in 5000K cool white colour temperature
- IP65 weather resistant, suitable for outdoor applications
- Wide 100° beam angle, ideal for general purpose lighting
- Efficient replacement for halogen and metal-halide floods
- 180° adjustable mounting bracket for easy installation

Professional LED Street & Area Lighting

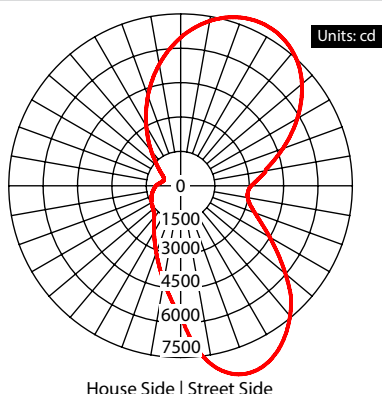

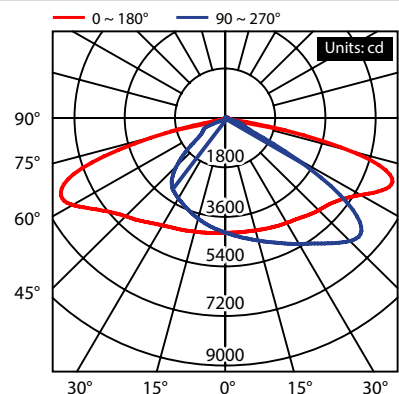

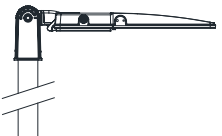

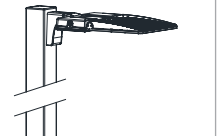

LSL-B Series: Street and area lighting available in 100W, 150W and 200W

The ENSA™ LSL-B Series comprises versatile LED lights with a variety of mounting and sensor options to deliver high performance street and area lighting. These luminaires offer impressive lighting with high energy efficiency in a robust slimline housing. LSL-B Series lights feature a wide range of mounting solutions to fit to a multitude of installation requirements. Models also feature the option for built-in dusk/dawn switching and motion detection by passive infrared or microwave sensors.

LSL-B Series lights are ideal for illumination in street lighting applications, in area lighting for public spaces and for general purpose lighting in a variety of commercial and industrial building environments.

- High luminous efficacy up to 135lm/W
- Batwing or square distribution for street & area lighting
- Long lifespan LED lighting: rated for up to 50,000 hours
- Rotate polycarb lens for easy light direction adjustment
- Includes in-line surge protection for up to 20KV
- Robust IP66/IK08 weather & vandal resistant housing
- Photocell & PIR / microwave motion sensor optional
- Versatile mounting with 5 adjustable light brackets

Motion Activated Solar LED Street Lighting

SSL-B Series: Solar LED street lighting with microwave motion detection in 30W, 50W & 60W models

The ENSA™ SSL-B Series comprises motion-activated, solar-powered LED street lights, designed to deliver standalone lighting to outdoor locations without mains power access. SSL-B Series models couple monocrystalline silicon solar panel technology and high capacity lithium iron phosphate (LiFePO4) batteries for efficient use & extended operating time.

Models feature a customisable motion detection system that can be configured for street, area & security lighting, and other off-grid outdoor lighting purposes. They are ideal for use in remote or under-developed locations such as on rural roads, at remote fences/gates, in construction sites, and in general street lighting applications.

- Outstanding energy efficiency at >180lm/W performance
- Up to 21% conversion rate monocrystalline solar panels
- Dusk/dawn switch, motion sensing & on-time delay
- Configure power output for different times of the day
- 60° tilt-adjustable LED modules for lighting customisation
- Multiple days of use from full charge (sensor mode, overcast)
- LED available in 5700K cool white colour temperature
- IP65 weather rated with included bird guard (optional)

Superb off-grid lighting

Superior lighting in challenging locations

SSL-B Series Solar LED Street Lights offer superb lighting results for an off-grid system. Models feature incredible light output and LED lifespan, making them an ideal long-term street or area lighting solution for locations without access to mains power.

- High efficiency +180lm/W LED lighting module
- 50,000hrs LED lifespan & microwave motion sensing
- Adjustable LED light module, tilt -30° ~ 30°

Latest solar technology

Excellent solar energy generation & storage

SSL-B Series monocrystalline solar panels are built for high performance with large panel surface area to maximise solar energy generation. Models are paired with the latest lithium battery technology for increased light uptime, even in extended periods of sub-optimal solar generation conditions.

- Monocrystalline panel for $\geq 21\%$ panel conversion
- Lithium iron phosphate batteries (LiFePO4)
- Multiple days of light uptime across the range

Optimise your solar light

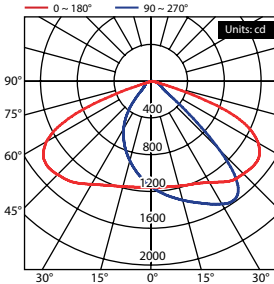

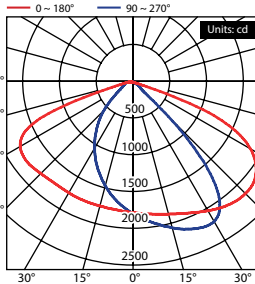

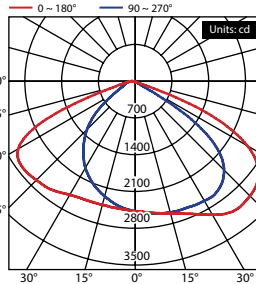

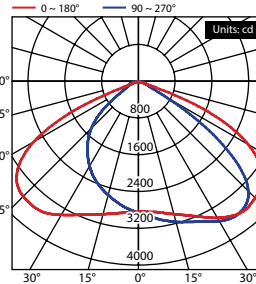

Fully configure your LED solar lighting system

Customise SSL-B Series Solar LED Street Lights to your exact specifications quickly via infrared remote control. Monitor system health, set motion detection properties and configure as per your application requirements.

- Panel & battery control and panel-driven dusk/dawn
- Configure light output for up to 5 time periods
- Setup motion detection lighting with motion sensor adjustment & dimmed light output levels
- Set custom on-time delay from 0s up to 120s

Professional LED Canopy Lighting

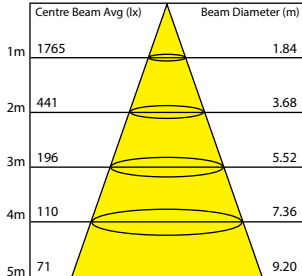

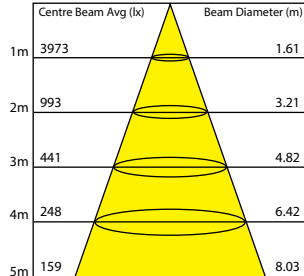

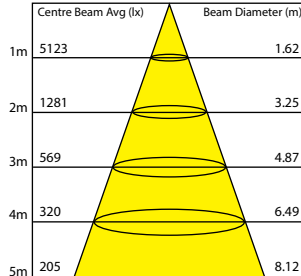

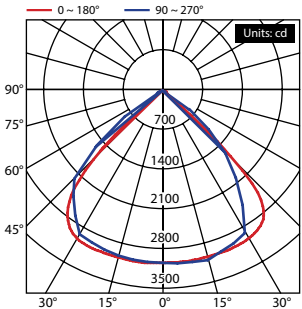

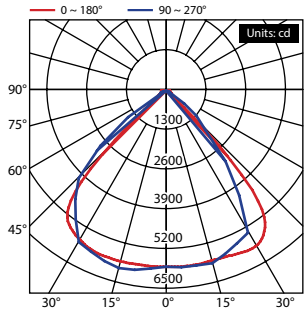

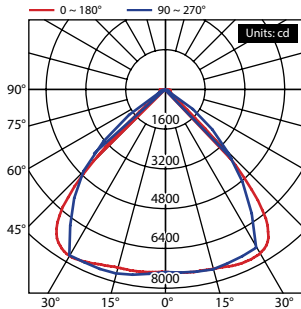

LCL-B Series: Surface or recessed mount canopy lights in 50W, 100W and 150W models

ENSA™ professional LED canopy light series is comprised of energy efficient fixtures purpose built for low-bay or canopy lighting applications. Lights include mounting components for both surface mount or recessed mount applications.

Each light in the series features an IP65 dust/water ingress protection rating making them perfect for demanding lighting applications such as in petroleum stations, car parks & car washes, industrial lighting and more. This series utilises high quality Epistar LEDs for high-intensity light output and long LED lifespan.

- Efficient replacements for high intensity discharge lamps
- Square light pattern with 90° x 90° beam angle
- Available in natural white colour temperature (4500K)
- Lights include kits for surface and recessed mounting
- IP65 dust and weather resistant for external use
- Series is IPART approved for use in the NSW ESS

Professional LED Panel Lighting

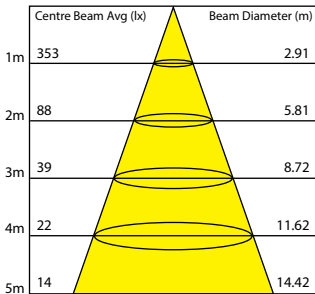

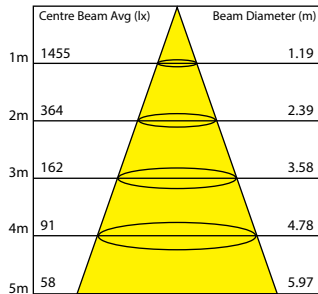

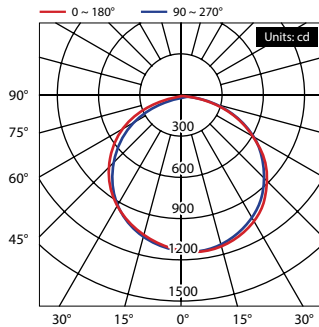

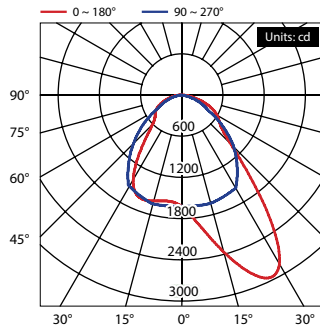

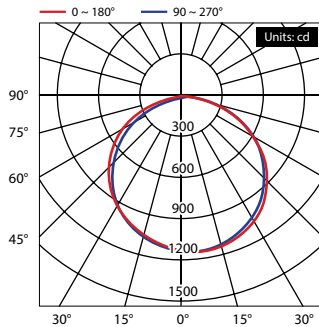

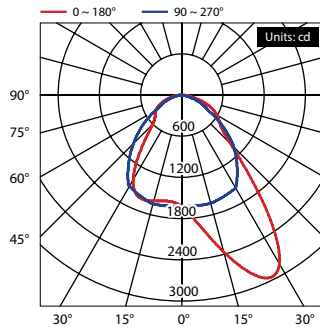

LPL-A series: Low unified glare rating panel lighting in 36W and 48W models

ENSA™ LED panel lights are for replacing traditional tube lighting and are best suited for office and business, in medical and educational environments, in conference rooms, and more. These convenient and efficient lights have a standard rectangular profile (1200 x 300mm) and can be easily recessed in tiled ceilings, surface mounted or suspension mounted.

Each ENSA™ LED panel light features a low Unified Glare Rating, providing a pleasing light that isn't distracting or detrimental to workplace productivity. They are the efficient LED upgrade solution for fluorescent tube troffers.

- Minimalist, stylish & efficient 9mm thick LED panel light
- Recessed, suspension & surface mounting options
- Wide 90°/110° beam angle for even light distribution
- Available in cool & natural white colour temperatures
- Low UGR: Create pleasing, low glare, well lit spaces
- 30,000hrs LED lifespan & <3% light decay over 6,000hrs
- Designed to easily replace fluorescent troffer fixtures
- Series is IPART approved for use in the NSW ESS

Intelligent Sensor LED Batten Lighting

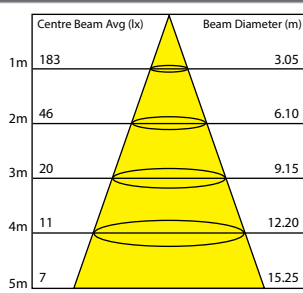

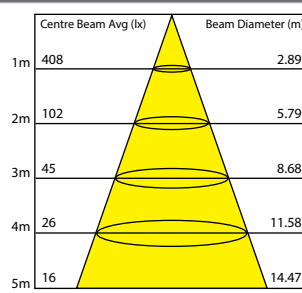

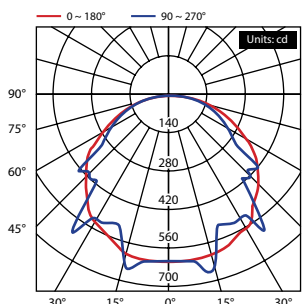

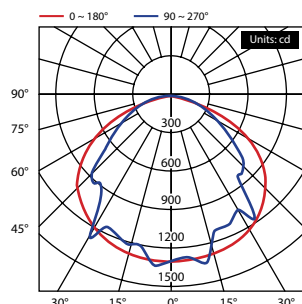

LEDBTS Series: 18W and 36W sensor battens in standard 600mm & 1200mm models

The ENSA™ LED batten light series comprises truly customisable energy efficient lighting solutions that deliver unparalleled control over your lighting, without the need for a complex management system.

Each LED batten uses a fully-configurable ambient light sensor, 5.8GHz microwave motion sensor and light on-timer in tandem, achieving impressively low total energy consumption when compared to traditional twin-batten fluorescent tubes. They are perfect for areas with intermittent people traffic such as in stairwells, corridors, underpasses, multi-storey car parks and more.

- Tailor your light use to further compound energy savings
- Adjustable light & motion sensing with on-time control
- Sensor can detect motion through glass and thin walls
- Built tough housing: IP65 dust and weather resistant
- Control standby mode: completely off or half brightness
- Long lifespan LED lighting: rated for up to 50,000 hours

LEDBT36WS: 36W LED Intelligent Batten Light		

Intelligent LED Batten Lighting with Backup

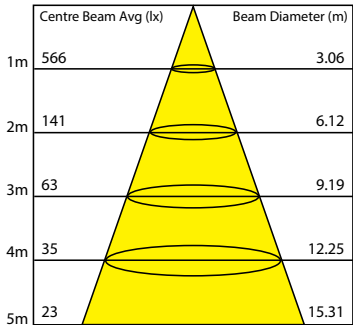

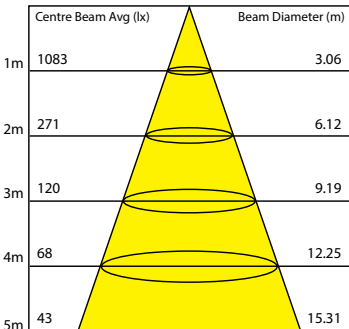

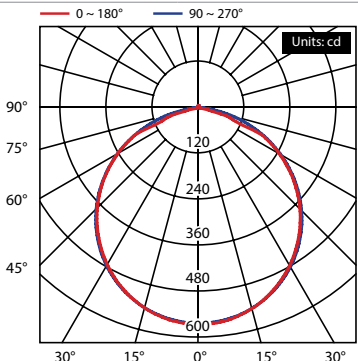

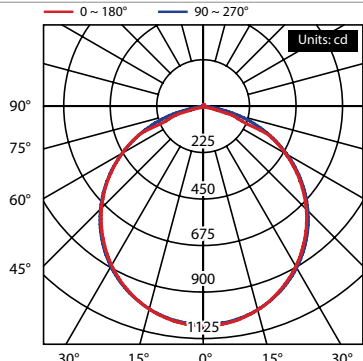

LEDBTWS2 / SE Series: 18W and 36W battens in standard or battery backup models

The ENSA™ LED batten light series comprises customisable energy efficient lighting solutions that deliver control over your lighting, without the need for a complex management system. Models are available as standard sensor batten lights or as an emergency sensor batten light fitted with an emergency backup battery for up to 5 hours light uptime.

Intelligent emergency battens feature motion detection, on-time delay and standby time delay functions to tailor your light use for efficiency & practicality. Each model features 2-stage dimming and can be configured to stay at 100% brightness, to dim and then turn off, or to dim and stay dimmed. Ideal in stairwells, corridors, underpasses, multi-storey car parks and more.

- 18 / 36W LED batten lights in standard & intelligent models
- Tailor your light use to further compound energy savings
- Adjustable light-use controls such as on-time delay
- Sensor can detect motion through glass and thin walls
- Built with tough housing: IP65 dust and weather resistant
- Emergency lighting models are AS2293.3 approved.
- Easy access TEST button for emergency light testing
- Series is IPART approved for use in the NSW ESS

Intelligent LED Oyster Lighting with Backup

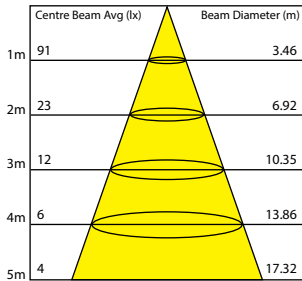

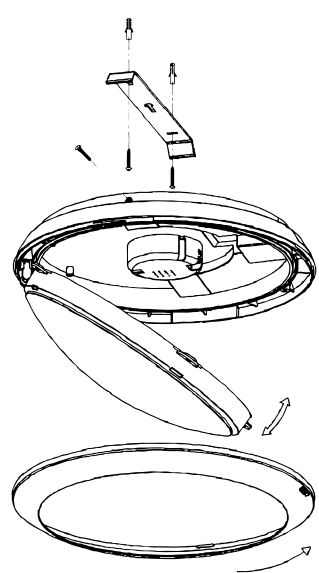

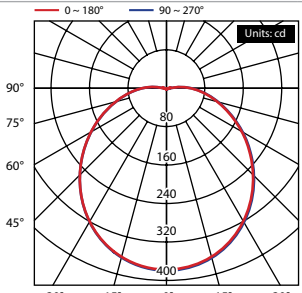

LOL-A Series: 16W LED oyster lights in standard and intelligent models - in warm or cool white

The LOL-A oyster light series delivers efficient lighting to any environment, indoors or outdoors. Available in warm or cool white colour temperatures as a standard light, with an intelligent sensor or with an intelligent sensor plus emergency backup battery.

The series features a wide 120° beam coverage and a frosted diffuser to reduce glare. The intelligent oyster light models feature three smart ways to customise your lighting with a fully-configurable ambient light sensor, 5.8GHz microwave motion sensor and light on-timer in tandem. This makes them the perfect lighting solution for areas with intermittent traffic such as in apartment complexes, stairwells, walkways, campuses and more.

- Tailor your light use to further compound energy savings.
- Adjustable light-use controls such as on-time delay.
- Sensor can detect motion through glass and thin walls.
- Robust IP66/IK10 weather & vandal resistant housing.
- Modern design with frosted diffuser and white surround.
- Long lifespan LED lighting: rated for up to 30,000 hours.

Professional T8 LED Tube Lighting

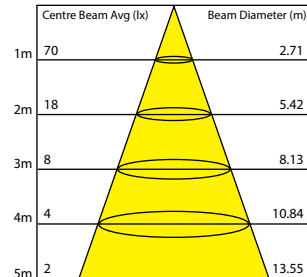

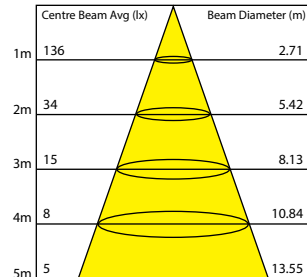

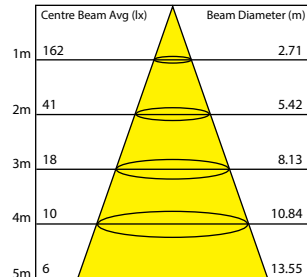

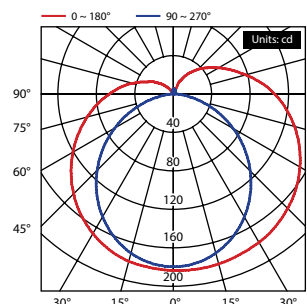

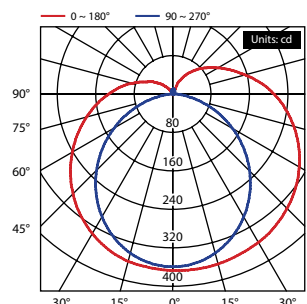

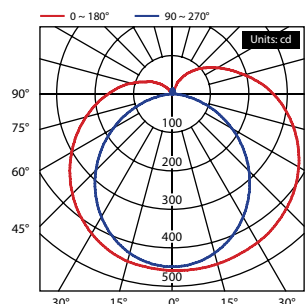

LTU-A Series: High performance LED tubes in 600mm, 1200mm and 1500mm models

The ENSA™ LED tube light series is designed to reduce your fluorescent tube lighting costs by a minimum of 50% and are available in 600mm (2ft), 1200mm (4ft) and 1500mm (5ft) lengths. LTU-A series tubes are more than just energy efficient options to conventional fluorescents. They also deliver better quality & longer lasting light with no UV, they do not require a magnetic or electronic ballast, they turn on/off instantly with no warm up period, they do not fade or flicker, and are 100% recyclable with no mercury or toxic materials.

Each tube features an AC input at one end only and is supplied with an LED starter to replace fluorescent tube fuses.

- Cut your energy use in half by switching to LED tubes.
- High luminous efficacy for optimal return on investment.
- Long lifespan LED lighting: rated for up to 50,000 hours.
- Retrofit or replace: ideal for car parks, offices and more.
- Polycarbonate for low risk of shock (standard model only).
- Supplied with replacement LED starter.

T8 LED Motion Sensor Tube Lighting

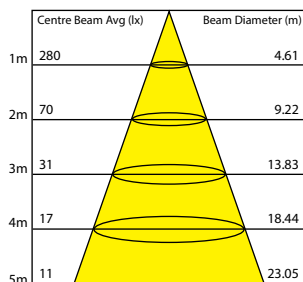

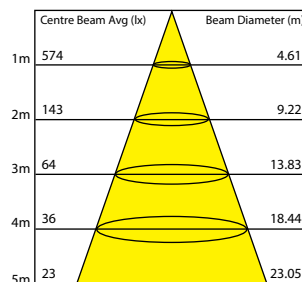

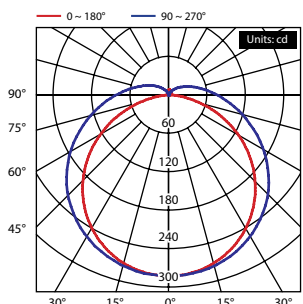

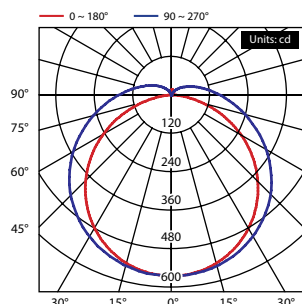

LTU-C Series: PIR motion LED sensor tubes in 600mm and 1200mm models

Compound your LED energy savings by choosing ENSA™ Intelligent LED Tube Lighting which are not only 50% more energy efficient than conventional fluorescents, but utilise motion sensor technology to achieve impressively low total energy consumption. This makes them the perfect energy efficient light for areas with intermittent people traffic such as in apartment complexes, stairwells, walkways, university campuses and more.

LTU-C series tubes do not require a magnetic or electronic ballast, and each tube features an AC input at one end only and is supplied with an LED starter to replace fluorescent tube fuses. *(see installation diagrams)*

- Cut your energy use in half by switching to LED tubes.
- 360° passive infrared motion detection up to 8m radius.
- 60s delay after last detected motion, then dims to 30%.
- High luminous efficacy for optimal return on investment.
- Long lifespan LED lighting: rated for up to 50,000 hours.
- Supplied with replacement LED starter.

Linkable LED Strip Lighting

LEDBR Series: 13W in two colour temperatures, with surface & right angle brackets

The ENSA™ LED linkable strip light range offers energy efficient lighting in a uniquely versatile, slim package. Connect three LED strip lights together for a maximum 3.5m length LED light strip.

Each linkable strip light comes standard with light connectors, connector safety caps, and surface mount and right angle mount clips. The simple mounting clips enable implementation of the linkable strip light across a wide variety of applications including shelf and cabinet lighting, accent lighting, recessed wall-wash lighting and more.

- Unique, energy efficient linkable LED strip lighting.
- Connect up to 3 lights together; easy on/off switch.
- 78lm/W luminous efficacy & 30,000 hours service life.
- Available in 3000K warm white and 6500K cool white.
- Right angle & surface clips enable rapid light installation.
- Wide 135° beam angle and >80 colour rendering index.

Premium Adjustable Body LED Downlights

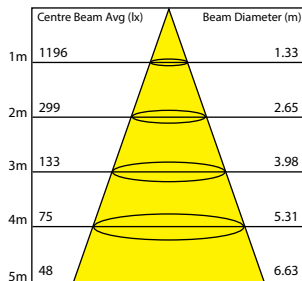

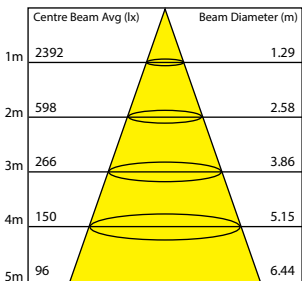

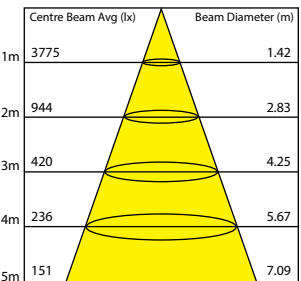

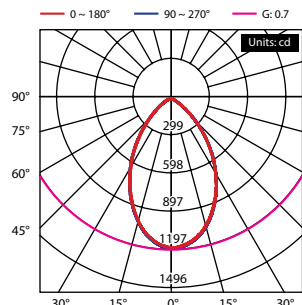

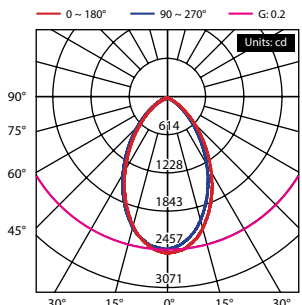

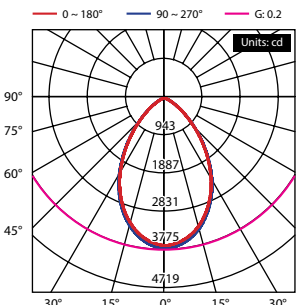

LEDDL Series: Tilt/rotate adjustable circular downlights in 20W, 38W and 60W models

Choose the ENSA™ premium range of adjustable LED downlights for the best in light output, service life, colour rendering accuracy and more. Available in cool and warm white colour temperatures, these downlights utilise high quality Samsung LEDs to provide a minimum of 95lm/W luminous efficacy and up to 50,000 hours rated LED lifespan.

Each downlight in the range can rotate 350° and tilt up to 60°, coupled with a 60° beam angle, these lights are perfect for versatile spot or key lighting in retail spaces, showrooms, foyers, office environments and more.

- Excellent alternative to halogen and metal-halide lamps.
- Ideal for use in shopfitting applications & large fitouts.
- Versatile: 350° rotation and 60° tilt adjustable housing.
- Minimalist, bevelled white gimble downlight surround.
- Samsung LEDs for optimal performance & lifespan.
- Hole cut size: Ø165mm (20W, 38W) and Ø215mm (60W).

Premium Adjustable Body LED Downlights

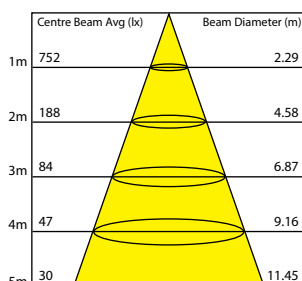

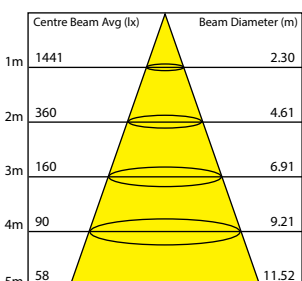

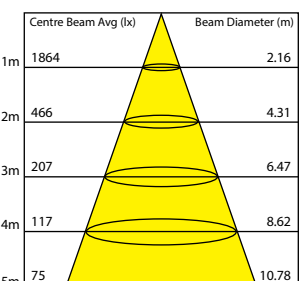

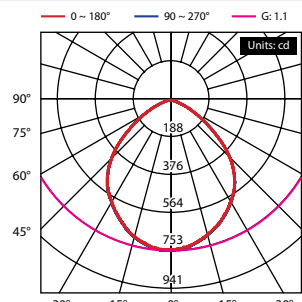

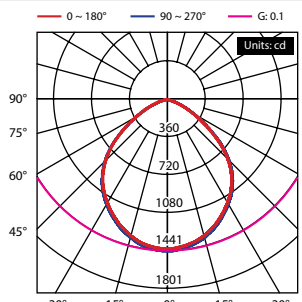

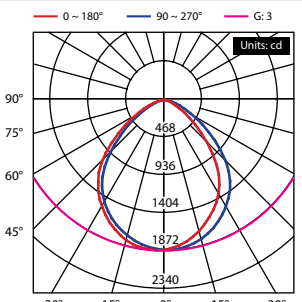

LEDDL Series: Tilt adjustable rectangular downlights in 20W, 38W and 48W models

Choose the ENSA™ premium range of adjustable LED downlights for the best in light output, service life, colour rendering accuracy and more. Available in cool and warm white colour temperatures, these downlights utilise high quality LEDs to provide a minimum of 100lm/W luminous efficacy and up to 50,000 hours rated LED lifespan.

Each downlight in the range can tilt up to 60° and features a wide beam angle of 100°. Their rectangular shape and light distribution makes them ideal for bay lighting, signage illumination and wall highlighting, especially in retail environments.

- Excellent alternative to halogen and metal-halide lamps
- Ideal for use in shopfitting applications & large fit-outs
- Excellent colour rendering, lifespan and light output
- Minimalist, bevelled white gimble downlight surround
- 60° tilt adjustable & frosted diffuser for glare reduction
- Uniform hole cut size across range: 227 x 130mm

LEDDL20W5KS: 20W Rectangular Adjustable Downlight in Cool White			

Premium Fixed Body LED Downlights

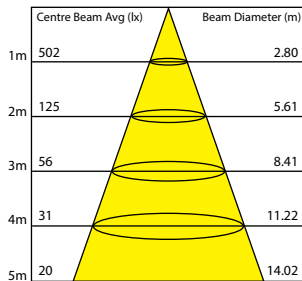

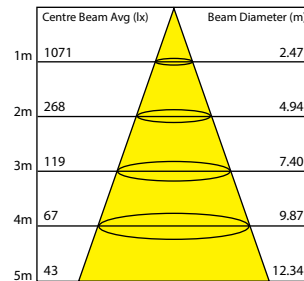

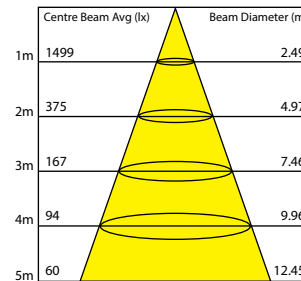

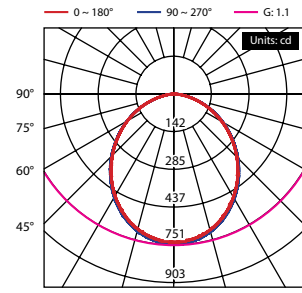

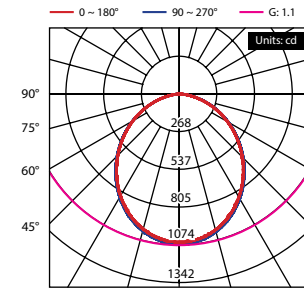

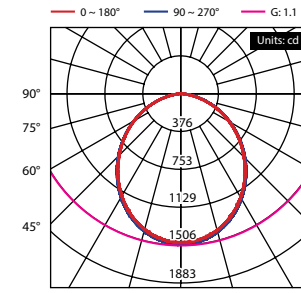

LEDDL RD Series: Dimmable downlights in 20W, 36W and 48W, in two colour temperatures

Choose the ENSA™ premium range of fixed LED downlights for the best in light output, service life, colour rendering accuracy and more. Available in cool and warm white colour temperatures, these downlights utilise high quality Samsung LEDs to provide a minimum of 92lm/W luminous efficacy and up to 50,000 hours rated LED lifespan.

With a 100° beam angle and circular light distribution, these lights are designed to provide evenly distributed, high quality light perfect for general purpose illumination in store fit-outs, galleries, residential and office environments and more.

- 100lm/W high efficiency, low energy use LED downlights
- 6" and 8" total diameter, suitable for retrofit installations
- Excellent colour rendering, lifespan and light output
- Minimalist, bevelled white gimble downlight surround
- Each downlight model features TRIAC dimming
- Hole cut size: Ø165mm (20W, 36W) and Ø205mm (48W)

Commercial Adjustable Body LED Downlights

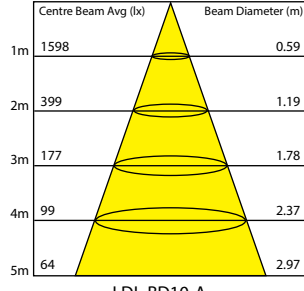

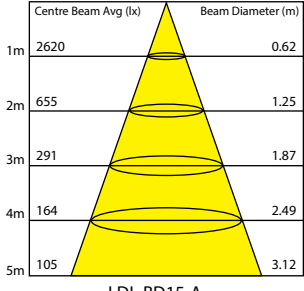

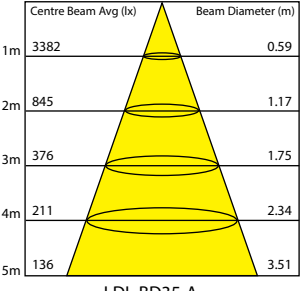

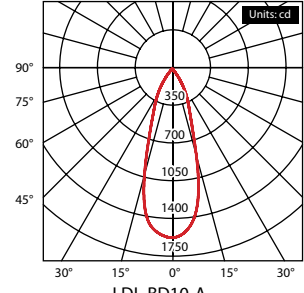

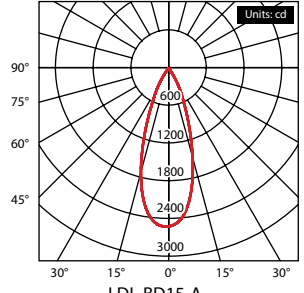

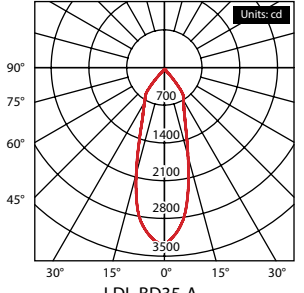

LDL-BD Adjustable Series: Available in six dimmable models, in two colour temperatures

Available in a wide range of wattages and hole cut sizes to suit your installation needs, the ENSA™ LDL-BD adjustable commercial downlight series delivers energy efficient, dimmable downlights for every application. With focused beam angles across the range, LDL-BD adjustable series downlights provide concentrated light distribution, ideal for key and spot lighting.

Each downlight can be tailored to your specifications, featuring an adjustable housing with 40° of lateral tilt ($\pm 20^\circ$). The series is available in 3000K warm white and 6000K cool white models with an average luminous efficacy of 70lm/W across the range.

- Available in 10W, 12W, 15W, 25W, 35W and 45W models
- Average beam angle of 35°, ideal for spot & key lighting
- Dimmable, energy efficient replacement for halogens
- Rounded, white gimble surround & clear glass diffuser
- Lateral tilt adjustable housing $\pm 20^\circ$ from origin
- Hole cut sizes ranging from Ø75mm ~ Ø160mm

Recessed Adjustable Body LED Downlights

LDL-BC Series: Available in 10W and 12W dimmable models, in two colour temperatures

The ENSA™ LDL-BC series comprises a unique range of downlights, available in standard lens and recessed lens models. Standard lens models offer a concentrated circular light distribution with 60° beam angle. All models are dimmable.

Designed to be discreet, recessed lens models have the lens front positioned away from the light opening. Combined with their 20° narrow beam angle and tilt-adjustable housing, they subtly cast light that is free of glare when viewed from almost all angles. Light openings for recessed models are available in circle and elliptical openings.

- Tilt adjustable LED downlights in 10W and 12W models.
- Dimmable, energy efficient replacement for halogens.
- Lateral tilt adjustable housing $\pm 20^\circ$ from origin.
- Flat-surface, low-profile white gimble (recessed models).
- Simple, stylish bevelled white gimble (standard models).
- Hole cut size: Ø80mm (10W) and Ø70mm (12W).

Commercial Fixed Body LED Downlights

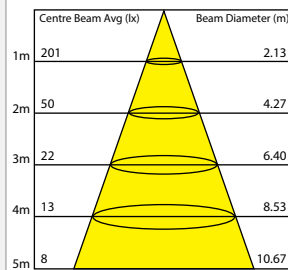

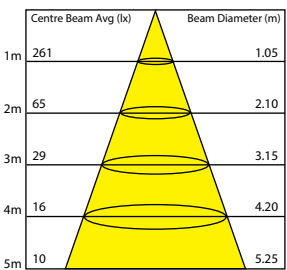

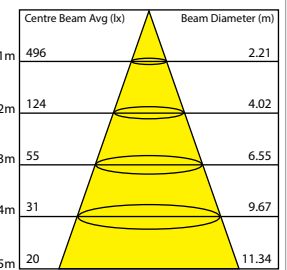

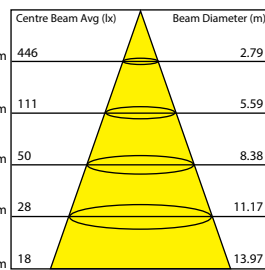

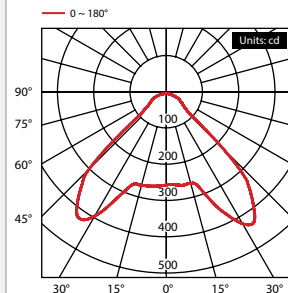

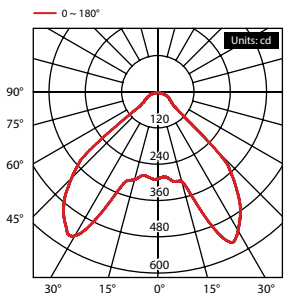

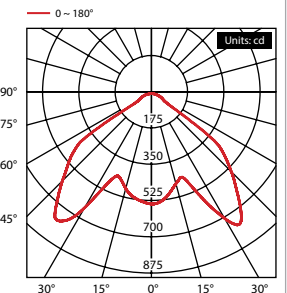

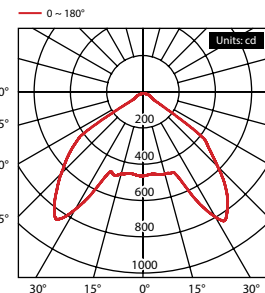

LDL-BD Fixed Series: Available in four dimmable models, in two colour temperatures

Available in a wide range of wattages and hole cut sizes to suit your installation needs, the ENSA™ LDL-BD fixed commercial downlight series delivers energy efficient, dimmable downlights for every application.

LDL-BD fixed series downlights are an affordable, energy efficient upgrade for existing halogen downlights. They are available in a variety of hole cut sizes and beam angles, and come in 3000K warm white and 6000K cool white colour temperatures. Each downlight in the series is dimmable and features a simple and stylish white gimble surround and partially frosted diffuser.

- Available in 9W, 15W, 20W, and 30W models.
- Average luminous efficacy of 74lm/W across the range.
- Dimmable, energy efficient replacement for halogens.
- Recessed, white gimble with partially frosted diffuser.
- Long life LEDs with 35,000 hours rated service life.
- Hole cut sizes ranging from Ø95mm ~ Ø195mm.

Ultra Thin & Surface Mount LED Downlights

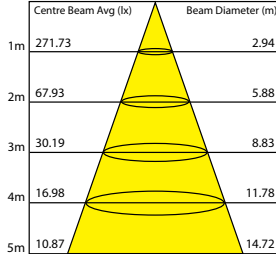

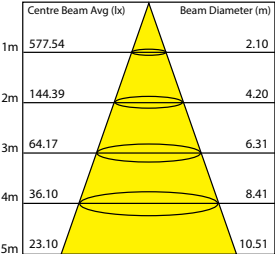

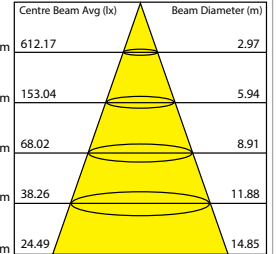

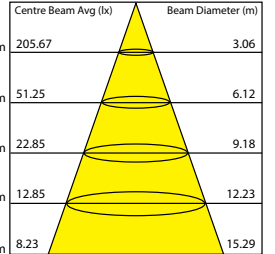

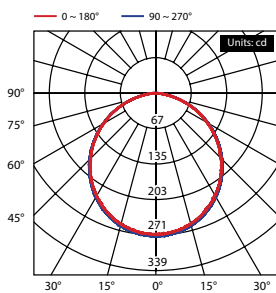

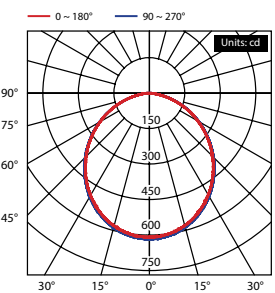

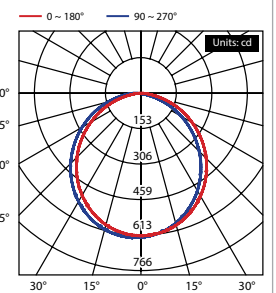

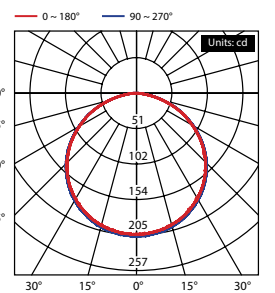

LDL-D Series: Available 12W, 18W and 24W models, in two colour temperatures

The ENSA™ LDL-D Series features ultra thin LED downlights in two distinct housing styles. Available in surface mount or ultra-thin recessed mount, LDL-D Series downlights offer stylish & efficient general purpose lighting in warm and cool white colour temperatures.

With a profile of as little as 15mm, ultra-thin housing downlights (LDL-DT) can be installed in tight wall or ceiling cavities. Surface mount models (LDL-DS) offer an elegant lighting fixture with a simple U-bracket for easy installation.

- Available in ultra-thin recessed & surface mount designs.
- 70lm/W LED performance, available in 3000K & 6000K.
- Frosted diffuser for low-glare, pleasing LED lighting.
- >80 colour rendering & 35,000 hours rated LED lifespan.
- Variety of hole cut sizes: Ø155mm, Ø205mm, Ø280mm.
- Includes mounting kits with screws & wall plugs.

Commercial Fixed Body LED Cabinet Lights

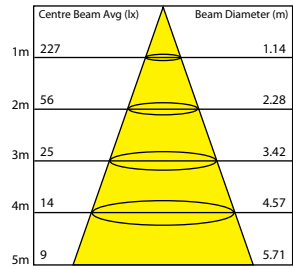

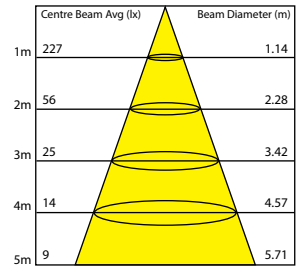

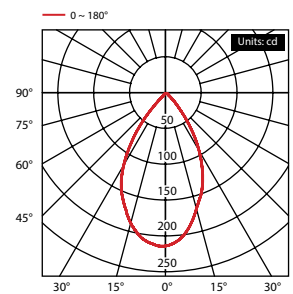

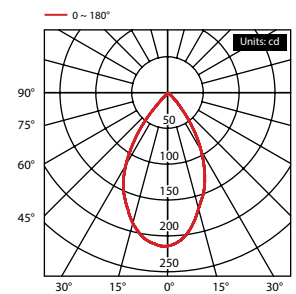

LDL-BA Series: Available in two styles and two colour temperatures

The commercial fixed LED cabinet light range from ENSA™ comprises small and efficient LED fixtures available in two styles and hole cut sizes to suit your installation needs.

The LDL-BA series features uniquely packaged LED cabinet lights, with six individual lights operating on a single transformer. This makes them ideal in showrooms and stores for shelf and display case illumination. They are available in square or round design, in cool and warm white colour temperatures.

- Set of six dimmable LED cabinet lights with single driver.
- Spot 45° beam angle for concentrated light distribution.
- 200lm light output, equivalent to 15W halogen.
- Ideal energy efficient lighting replacement for halogens.
- Long life LEDs: minimum 35,000 hours rated service life.
- Hole cut sizes ranging from Ø28mm ~ Ø38mm.

Residential Fixed Body LED Downlights

LDL-BB Series: Variety of styles and wattages, in multiple colour temperatures

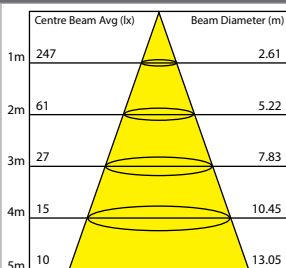

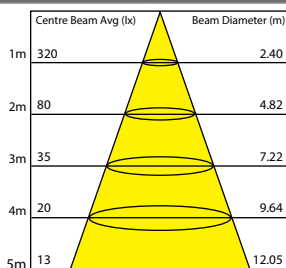

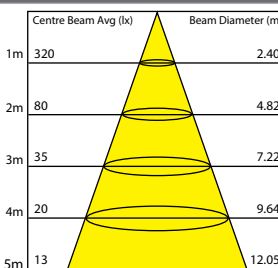

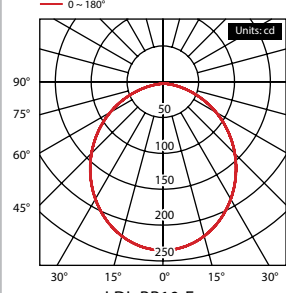

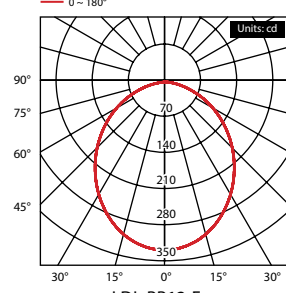

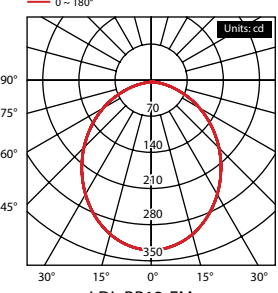

The residential fixed LED downlight range from ENSA™ comprises small and efficient LED fixtures in variety of styles, wattages and hole cut sizes to suit your installation needs.

LDL-BB series downlights are small form factor LED fixtures available in flat and bevelled gimble styles, in cool and warm white colour temperatures. The LDL-BB13-FM downlights feature both warm and cool white LEDs which allows you to cycle through three colour temperatures - warm white (3000K), natural white (4500K) and cool white (6000K).

- LDL-BB series: Bevelled or flat style dimmable downlights
- LDL-BB13-FM series: 3 switchable colour temperatures
- Also available: option for integrated driver models
- Ideal energy efficient lighting replacement for halogens
- Long life LEDs: minimum 30,000 hours rated service life
- Hole cut sizes ranging from Ø75mm ~ Ø150mm

LED Retrofit Bulb Lighting

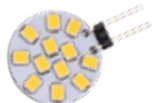

LBL-B Series: Available in a variety of styles and wattages, in two colour temperatures

Available in a variety of base fixtures, input voltages, wattages and colour temperatures, the LBL series of LED retrofit bulbs provides an easy path to energy efficient, long life LED illumination. They are available in G4, G9, and E14 bases.

LBL-BA series G4 and LBL-BB series G9 base lights are ideal replacements for halogen lamps and are used in cabinet lights, designer fittings, RV & caravan lamps, in bathrooms & kitchens and more. The LBL-BC series E14 base lights replace small fittings such as those found in appliance lighting.

- Replacement bulbs for a wide range of base fixtures
- Improve energy efficiency & save on relamping costs
- Available in 3000K warm and 6000K cool white
- Small form factor G4, G9 and E14 base fittings
- 30,000 hours rated service life and high colour accuracy
- Power flexible: Includes 12VDC and 240VAC input models

LBL-BA3-W2: 3W G4 Base LED Retrofit Bulb in Warm White

LED Retrofit Globe Lighting

LEDBL / GL Series: Variety of wattages in E27, B22, GU10, GU5.3 and PL G24 style fittings

The ENSA™ LED light globe series provides a variety of energy efficient LED bulbs, ideal for replacing shorter-lifespan, higher energy use incandescent, halogen and compact fluorescent bulbs. They are a perfect lighting solution for general purpose illumination.

Each ENSA™ LED light globe features a frosted diffuser to remove harsh LED glare, is available in cool & warm white temperatures and comes with a 10 year return-to-base warranty (excludes PL G24 lights, visit www.ensalife.com for full warranty terms)

This series is available in a variety of wattages and base fittings to handle all types of lighting upgrades. Form factors include standard light bulb replacements available in E27 screw base and B22 bayonet fitting; MR16 downlight bulb replacements in GU5.3 12V bi-pin fitting and GU10 240V bayonet fitting; and PL style fluorescent replacements in 2-pin & 4-pin variations.

LED Retrofit High Bay Lighting

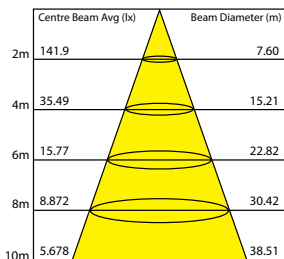

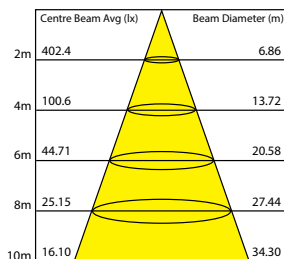

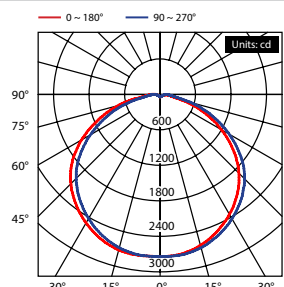

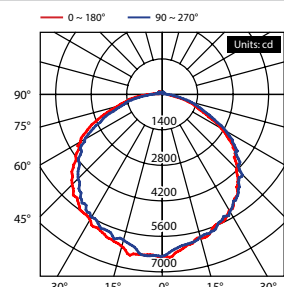

LBL-D Series: Retrofit E40 screw high bay LED bulbs available in 100W and 160W models

The ENSA™ LBL-D series enables rapid, energy efficient lighting upgrades of retail high bay installations in industrial and commercial environments. Quickly and easily replace E40 screw base lamps and save time on replacement with minimal interruption to operations.

The LBL-D series offers a far greater lifespan and energy efficiency than traditional metal halide lighting, saving on energy and lighting replacement costs. Available in 100W & 160W models in cool & natural white colour temperatures.

- High power bulb for industrial and commercial settings
- Improve energy efficiency & save on re-lamping costs
- E40 screw based for retrofit lighting installations
- Long life LEDs: minimum 25,000 hours rated service life
- Available in natural and cool white colour temperatures
- Reflector for high ceiling installations (*sold separately*)

LED Retrofit Globe Lighting

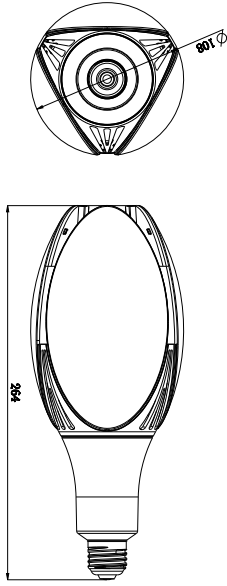

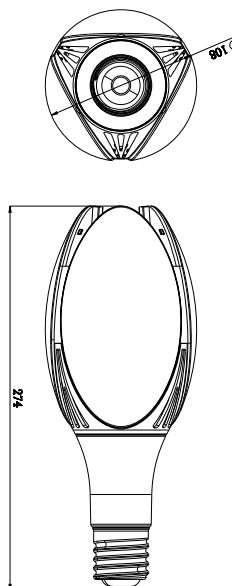

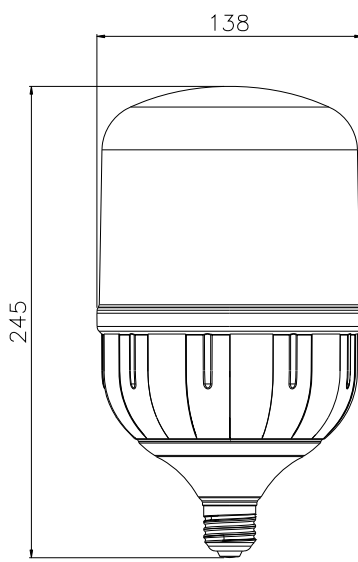

LBL-D Series: Available in 42W and 45W in E27 and E40 screw base fittings.

The ENSA LBL-D Series LED globes deliver rapid energy efficient lighting upgrades without the need to replace entire lighting fixtures. Make lighting upgrades simple with E27 and E40 screw fittings and provide rapid retrofit lighting far more efficiently than traditional compact fluorescent lights.

LBL-D Series retrofit globes are available in two unique designs that fit to traditional light enclosures, making LED upgrades easy. They are ideal across residential, commercial and public spaces and are perfect for general purpose lighting in lamp posts, area lights, gate lamps, architectural lighting, interior lighting and more.

- Improve energy efficiency with up to 120lm/W bulbs
- Low-glare and durable frosted polycarbonate lens
- Available in 4000K natural white colour temperature
- Great lumen maintenance & lifespan up to 25,000 hours
- Two common bulb styles for traditional light enclosures
- Standard E27 and E40 screw fit bulbs; optional converter

Series Specifications

Model	LBL-D42-E27		LBL-D42-E40	LBL-D45-E27	
Product Image					
Series Name	LBL-D Series Retrofit Light Globes				
Optical					
Light Output	5000lm			4500lm	
Luminous Efficacy	120lm/W			100lm/W	
Colour Temperature	4000K				
Colour Rendering Index	>80				
Beam Angle	330°			180°	
Light Decay	<70% after 25,000 hours			<80% after 6000 hours	
Rated Lifespan	25,000 hours				
Electrical					
Power Consumption	42W			45W	
Input Voltage	220 ~ 240VAC 50Hz				
Power Factor	>0.9				
Dimmable	N/A				
General					
Construction / Material	Polyamide body, polycarbonate frosted lens				
Ingress Protection	IP20				
Plug / Socket / Base	E27	E40		E27	
Operating Environment	-20 ~ +40°C				
Dimensions	Ø108 x 264mm	Ø108 x 274mm		Ø138 x 245mm

E27-E40BASE: E27 transfer into E40 Base Adapter	

Intelligent Motion Sensor & Dusk/Dawn Switches

ENSA-MS/PS/LC Series: Microwave motion, PIR motion & light sensors in a variety of styles

The ENSA™ intelligent energy saving switch series comprises a wide range of automated, smart switches that use a variety of different sensors to control light use. This innovative combination of sensors ensures your lights will only turn on when you need them to, saving you on power costs and reducing the impact on the environment.

Each intelligent switch features adjustable light sensing, movement sensing and on-timer delay so you may tailor light use to your exact specifications. The range includes models with 5.8GHz microwave or passive infrared (PIR) for movement sensing.

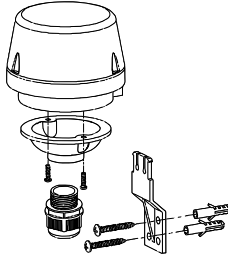

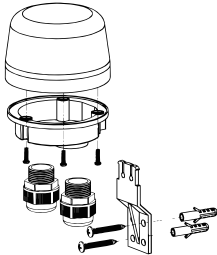

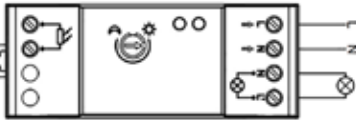

Once installed, the switch's daylight sensor measures ambient light levels. If light levels fall below the set limit, the motion sensor is activated. Upon detecting motion, the switch will turn the connected light on. When movement is no longer detected, the switch's adjustable on-timer delay will keep the light on for a designated period of time. Once this delay has expired, the switch turns the light off automatically.

2 Channel Mains Voltage Receiver (433.92MHz)

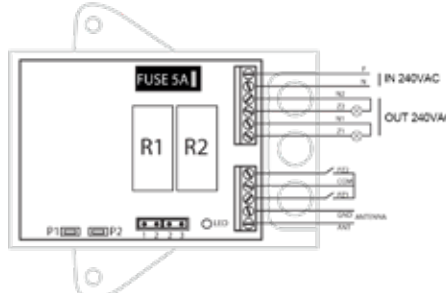

ENSA-RS Series: Trigger lights automatically by connecting to universal transmitters

Automate your LED lighting with the ENSA-RS1 2 channel 240VAC mains voltage RF receiver. With a maximum rated load of up to 1000W, you can integrate wireless triggering for a large number of lights via this receiver. The receiver shell is IP55 rated and suitable for external use.

The ENSA-RS1 includes two keyfobs for light control. The receiver can also be triggered by up to 128 universal transmitters. This includes wireless passive infrared detectors, beam/curtain detectors and door/window reed switches. This makes the ENSA-RS1 ideal for effective security lighting applications.

Contact your local ENSA™ professional for more information on universal wireless detector integration. Wireless transmitters are optional and sold separately.

Wireless Receiver | Series Specifications

Model	ENSA-RS1
Product Image	
Frequency	433.92MHz fixed code
Range (LoS)	100m
Programmable Outputs	2 relay outputs (latched or timed)
Maximum Codes	128
Electrical	
Input Voltage	240VAC 50 ~ 60Hz
Maximum Rated Load	1000W
General	
Ingress Protection	IP55
Included Remotes	2
Operating Environment	-20 ~ 55°C

Universal Transmitters | Additional Information

The ENSA-RS1 can be configured to have up to 128 universal transmitters. It is compatible with a wide range of wireless sensors, including:

- **Wireless reed & roller shutter reed switches:** Ideal for trigger lights on open/close, garages, sheds, warehouses, halls, on windows etc.
- **Passive infrared detectors:** Standard pet immune, ceiling mount and solar powered external sensors; perfect for triggering lights on general motion detection. Great for energy saving in intermittent people traffic areas.
- **Infrared beam presence detector:** Ideal for wireless curtain beam detection, eg: gates, walkways, corridors, fences, etc.

Glossary

Color Rendering

A general expression for the effect of a light source on the color appearance of objects.

Color Rendering Index (CRI)

A measure of the degree of color shift objects undergo when illuminated by the light source as compared with those same objects when illuminated by a reference source of comparable color temperature. The reference source has a CRI of 100.

Correlated Color Temperature (CCT)

The absolute temperature of a blackbody whose chromaticity most nearly resembles that of the light source. Usually specified in Kelvin (K). The lower the Kelvin temperature, the warmer the light feels, or appears.

Diffuser

An object with irregularities on a surface causing scattered reflections.

Digital Addressable Lighting Interface (DALI)

A digital communications protocol for controlling and dimming lighting fixtures, originally developed in Europe.

Driver

An electronic circuit that converts input power into a current source — a source in which current remains constant despite fluctuations in voltage. An LED driver protects LEDs from normal voltage fluctuations, overvoltages, and voltage spikes.

Efficacy

The light output of a light source divided by the total electrical power input to that source, expressed in lumens per watt (lm/W).

Energy Saving Scheme (ESS)

The IPART New South Wales Energy Saving Scheme aims to reduce electricity consumption by creating financial incentives for organisations in the form of energy saving certificates.

Halogen Lamp

A type of incandescent lamp that has a small amount of a halogen such as iodine or bromine added. The addition of the halogen aims to increase the lifespan and clarity of the tungsten filament creating the light.

Heat Sink

A part of the thermal system that conducts or convects heat away from sensitive components, such as LEDs and electronics.

High Intensity Discharge (HID) Lamps

A type of electrical gas-discharge lamp which produces light by means of electric arc in a tube filled with gas & metal salts. Types of HID lamps include high-pressure sodium (HPS), mercury-vapour, metal halide, ceramic metal-halide & xenon short arc.

Illuminance

The intensity of light falling on a surface area. If measured in square meters, the unit of illuminance is lux (lx).

Incandescent Lamp

A type of lamp that produces light by heating a filament wire to a hot temperature by passing an electric current through it.

Kelvin Temperature

Term and symbol (K) used to indicate the comparative color appearance of a light source when compared to a theoretical blackbody. Yellowish incandescent lamps are 3000K. Fluorescent light sources range from 3000K to 7500K and higher.

Light Emitting Diode (LED)

A Light Emitting Diode (LED) is a solid-state semiconductor device that converts electrical energy directly into light.

Lumen

The SI unit of luminous flux, equal to the amount of light emitted per second in a unit solid angle of one steradian from a uniform source of one candela.

Lumen Depreciation

Describes the percentage of light lost relative to the initial lumen output.

Luminous Flux

Luminous flux is the measure of the perceived power of light, adjusted to reflect the varying sensitivity of the human eye to different wavelengths of light

Lux (lx)

The SI unit of illuminance, or luminous flux incident on a unit area, frequently defined as one lumen per square meter (lm/m²).

Power Factor

The active power divided by the apparent power (i.e., product of the rms input voltage and rms input current of a driver).

Thermal Resistance (K/W)

The property of a material's ability to conduct heat.

Unified Glare Rating (UGR)

The number defining glare using luminance of a lamp divided by the background visible luminance of a room. Ranging from 5 to 40, lower numbers mean less glare.

Watt (W)

The unit of electrical power as used by an electrical device during its operation. Many lamps come with rating in watts to indicate their power consumption.
